# Support

You can reach me by using the ticketing system at:

<https://ecommy.com/support/>

# Install

Log in into the backoffice and go to modules, then install the plugin like any other one from prestashop:

The screenshot shows the PrestaShop backoffice interface. The top navigation bar includes a search bar, a 'Quick Access' dropdown, and a 'View my shop' link. The left sidebar contains a menu with categories like DASHBOARD, CATALOG, ORDERS, CUSTOMERS, PRICE RULES, and MODULES. The 'MODULES' category is selected, and the 'List of modules' page is displayed. The page title is 'List of modules'. The main content area shows a list of modules with columns for 'Search', 'Sort by', 'Enabled & Disabled', 'Authors', and 'Price'. The 'Add a new module' button is circled in red.

Search	Sort by	Enabled & Disabled	Authors	Price
1-Click Upgrade - AutoUpgrade v1.3.12 - by Prestashop	Administration	1	All	INSTALL
Abandoned Cart Reminder Pro v1.2.2 - by PrestaShop - Popular	Checkout	13	All	\$114.99
Advanced sales, tax, profit and profit margin reports v2.6.3 - by Business Tech - Popular	Analytics and Stats	9	All	\$179.99
Advanced Search 4 v4.10.3 - by Presta-Module - Popular	Search and Filter	27	All	\$279.99

## General configuration

Datepicker with hours

← back to backoffice

🔧 Configuration

📅 Available Week Days

🔒 Restricted Days

🛎 Support

Show calendar inline? ☐ Yes ☒ No

Shows the calendar inline rather than using an input field

Make selection required ☒ Yes ☐ No

Forces the calendar as required

Show for Carriers

datepicker (Pick up in-store)

My carrier (Delivery next day!)

Datepicker will appear for selected carriers only

Cut off Hour

12

Hour from wich the very next available day is not enabled anymore. Input a number between 0 and 23

First Delivery Day

1

First Available Delivery Day - e.g. 1 means one day after purchasing date

Hours to prepare order

5

When deliverying in the same day you may want past hour intervals not to show for selection. Decimals values are supported, for example 0.5=30min

Days ahead

100

How many days ahead to show in calendar?

Save

# Available week days

Here you can mark a day like Sunday of disabled, or edit available hour intervals by just clicking them.

## Add shipping details to email

In the order\_conf and new\_order emails just add {ey\_date} and {ey\_hour} to the place you want the delivery dates displayed.

```
145         </tbody>
146     </table>
147 </td>
148 </tr>
149 <tr>
150 <td class="box" colspan="3" style="background-color:#fbfbfb;border:1px solid #d6d4d4!important;padding:10px!important">
151 <p style="margin:3px 0 7px;text-transform:uppercase;font-weight:500;font-size:18px;border-bottom:1px solid #d6d4d4!im
152 Shipping
153 <span style="color:#777">
154 <span style="color:#333"><strong>Delivery info:</strong></span> {ey_date} {ey_hour}<br /><br />
155 <span style="color:#333"><strong>Carrier:</strong></span> {carrier}<br /><br />
156 <span style="color:#333"><strong>Payment:</strong></span> {payment}
157 </span>
158 </td>
159 </tr>
160 <tr>
161 <td class="space_footer" style="padding:0!important;border:none">&nbsp;</td>
162 </tr>
163 <tr>
164 <td style="border:none;padding:7px 0">
165 <table class="table" style="width:100%;background-color:#fff">
166 </table>
```

## Add shipping details to PDF invoice

The hooks are already implemented you just need to modify the pdf template (/pdf/invoice.tpl) which I choose not to overwrite not to break eventual custom changes you already may have made.

Inside the plugin I attached a file called to\_copy\_to\_root.zip that contains all you need. Just copy it over your prestashop folder. The change for the PDF invoice contains a couple of additional lines as shown

bellow:

```
68 <div style="line-height: 1pt">&nbsp;</div>
69
70 <!-- PRODUCTS TAB -->
71 <table style="width: 100%">
72 <tr>
73 <td style="width: 17%; padding-right: 7px; text-align: right; vertical-align: top; font-size: 7pt;">
74 <!-- CUSTOMER INFORMATION -->
75 <b>{l s='Order Number:' pdf='true'}</b><br />
76 {<order->getUniqReference()}<br />
77 <br />
78 <b>{l s='Order Date:' pdf='true'}</b><br />
79 {dateFormat date=<order->date_add full=0}<br />
80
81 {if isset(<$shipping_date>)}
82 <br />
83 <b>{l s='Delivery Date:' pdf='true'}</b><br />
84 {dateFormat date=<$shipping_date> full=0} {<$shipping_hour>}<br />
85 {/if}
86
87 <br />
88 <b>{l s='Payment Method:' pdf='true'}</b><br />
89 <table style="width: 100%;">
90 {foreach from=<$order_invoice->getOrderPaymentCollection() item=payment}
91 <tr>
92 <td style="width: 50%">{<$payment->payment_method>}</td>
93 <td style="width: 50%">{displayPrice price=<$payment->amount currency=<$order->id_currency>}</td>
94 </tr>
95 {foreachelse}
96 <tr>
```
